

Joshua R. Brandt, MSE

Software Engineer

Book via: <https://joshuabrandt.abacusai.cloud/invite/> | <https://joshuabrandt.abacusai.cloud>

Bio

Joshua R. Brandt, MSE is a software engineer with 30 years of shipping experience, now building at the frontier of agentic engineering. He speaks on the patterns that outlast hype cycles and on running real software through disciplined, auditable agent workflows — seasoned, building at the frontier.

Signature Talks (Representative — see site for current details)

Talks marked [ASSUMPTION] are representative/proposed working titles, not yet confirmed bookings.

1. [ASSUMPTION] Agentic Patterns That Ship: What 30 Years of Shipping Teaches the AI Era

Audience: Senior IC, Engineering Lead

Formats: Conference keynote (45 min); Workshop (90 min)

Key takeaways:

- [ASSUMPTION] A three-pattern checklist for evaluating agentic workflow reliability before production.
- [ASSUMPTION] How deterministic builds and audit trails change the failure-mode profile of AI systems.
- [ASSUMPTION] The two most common architectural shortcuts that generate rework in months 6–18.

2. [ASSUMPTION] Running Real Software Through Disciplined, Auditable Agent Workflows

Audience: Staff Engineer, Principal Engineer, Engineering Manager

Formats: Deep-dive session (40 min); Half-day workshop (3 hr)

Key takeaways:

- [ASSUMPTION] The three properties that make an agentic workflow auditable at 2 a.m.
- [ASSUMPTION] How file-based handoffs and gate structure reduce the blast radius of model errors.
- [ASSUMPTION] A retrospective pattern that prevents agentic anti-patterns from accumulating across sprints.

3. [ASSUMPTION] The Veteran IC Vantage: What 30 Years of Shipping Looks Like From the Inside the AI Transition

Audience: Senior IC, Engineering Lead, CTO

Formats: Keynote / fireside (30 min + Q&A); Panel anchor (flexible)

Key takeaways:

- [ASSUMPTION] The three engineering skills that compound across technology generations vs. those that depreciate.
 - [ASSUMPTION] What the agentic transition looks like from inside daily IC work — not from the analyst tier.
 - [ASSUMPTION] The questions a senior IC is uniquely positioned to ask about AI adoption — and how to ask them.
-
